

SoupBowl Gardens are a story of discovery and intrigue in crystal, lichen, rose quartz and beautifully hand-crafted copper teepees. Individually handmade, the detail will enrapture you. Imagine yourself climbing the ladder, wandering down the bark path into the forest and nesting in the teepee ensconced in magical nature. The whimsy and exquisite beauty of this little garden will connect you to nature and your imagination, no matter where you are inside. For a moment in time you can escape whatever holds you in one place and fly free with your dreams and hopes.

Each named and numbered garden is unique with fairy dust sprinkled up the trees and their own story!

CARE: Completely self contained, all they need are a little bit of light and a small jug of water once or twice a week. No mess involved, the garden drains into a hydroponic medium within the bowl. A beautiful gift for any garden lover stuck inside!
