

# LANDSCAPE DESIGN INCUBATOR

When making the change to a new career in Landscape Design, students often have anxiety about what they now realise they don't know and it can cripple the change momentum.

The Landscape Design Incubator program is designed to help you make that change, whether you've just finished study or have been giving Landscape Design a go for a while. It offers support, experience and encouragement in developing skills and to keep learning in a non-pressured environment at your pace. Located in Rosanna, 15km NE of Melbourne, there are opportunities to come on a casual or regular subscription basis and work at a desk, get some tutorial help on your projects, catch an education session or book a private design coaching session - there's even a longer term Mentoring program that covers all aspects of design & business, a chance to follow a professional designer and educator around and see how a professional Landscape Design business works. If you've studied Landscape Design in some form and would like to know more, call for a chat or email for the program details. Think of it as a launch pad for your future!

*Betsy-Sue has 17 years experience as a self employed Landscape Designer and Lecturer, passionately sharing knowledge, promoting healing gardens and offering opportunities for others to grow.*

**DIRTSCAPE  
DREAMING**

gardens of spirit to nurture heart and soul
